authoritative data**

**Legal and policy frameworks, including issues related to
authoritative data****Note by the Secretariat**

The Secretariat has the honour to bring to the attention of the Committee of Experts on Global Geospatial Information Management its report on the legal and policy issues to be considered in developing a framework to support global geospatial information management in the public and private sectors, including issues related to authoritative data. The report is available in the language of submission only from the website of the Committee of Experts (http://ggim.un.org/ggim_committee.html). The Committee is invited to take note of the report.

Summary of the report

At its fifth session, held in New York from 5 to 7 August 2015, the Committee of Experts adopted decision 5/107, in which it welcomed the report on legal and policy frameworks, including issues related to authoritative data, noted the updates on recent developments and increased focus that could have an impact on legal and policy frameworks supporting geospatial information, and that the geospatial community now needed to be more proactively engaged with issues relating to the collection, use, provenance and accessibility of data, such as privacy, licensing, quality and national security, as well as issues related to new disruptive technologies, such as unmanned aircraft systems (commonly known as drones). The Committee also recognized the growing need for geospatial professionals to understand the legislative and regulatory processes and their implications for the entire geospatial community, and for the legal profession and legislators to understand the wider use and benefits of geospatial information, and agreed that a plan of action and strategy should be prepared in consultation with the Centre for
